

December 2, 2010  
Mother Lode BLM  
Kanaka Valley Public Meeting Recommendations

- Access

Recommend that the BLM will partner with El Dorado County to form and execute an appropriate signage plan, which may include “no parking” signs along the road and parking lot restrictions. Signage options will also be explored to warn vehicles of road constraints (e.g. turn-around limitations). BLM and the County will also work together to study turn-around area potential and increasing/maintaining turn-outs.

- Private property

Recommend appropriate signage/informational kiosk on BLM Kanaka Valley property stating what activities are and/or are not permitted; provide adequate educational information, including pertinent emergency numbers and effective maps; plan location of trails to avoid private property (e.g. 150 yds from private property), and close problem trails and trails near “desirable” features on private property; and clearly indicate designated parking areas/trailhead.

*Other private property concerns, such as parking lot, trash receptacles, trail details and recreation safety, will be discussed/recommended in their respective sections in future meetings in January and February.*
